## Projects

### ProshnoPotro

PDF BOOK SELLING PLATFORM 2023 - 2023

ProshnoPotro is a PDF book-selling website.

there are a lot of features like login, registration, Book uploading only for admin, by the book, book features, book module, how to read the book, what are gettings on the book, what is needed to read the book, a section fro writer

### Alive Baby

E-commerce Multivendor Marketplace 2023 - 2023

Alive Baby is a robot toy marketplace. The website is built using React and vanilla CSS, without the use of any React or CSS frameworks or component libraries. The website utilizes the SweetAlert2 library for notifications when performing CRUD (Create, Read, Update, Delete) operations. and used without AOS Because this is required from the instructor.

### BD Dokan

E-commerce Multivendor Dashboard 2023 - 2023

The BD Dokan is the pulsating heart of our website, orchestrating a seamless symphony of features. It houses a Product Management System for posting, updating, and deleting products, an Order Management System for flawless transactions, and a User Management System for personalized user experiences. The Payment Method System ensures secure financial transactions, while the Product Marketing System captivates audiences with vibrant campaigns. Additionally, the Report and Chat with Customer System provides valuable insights and fosters real-time connections. Beyond a mere dashboard, it is an orchestrated masterpiece of E-commerce excellence.
